The Southern Railway.

It is said that the Southern Railway Company is considering the advisability of enlarging the machine and other shops of the company in this city. Many reasons are being urged why this should be done, although the company is still undecided and has not as yet announced its purpose. In the meantime about \$60,000 is being spent in railroad work at Monroe, the terminus of the Washington division. Damage suits and other matters incidental to depots in cities have, so far, caused the company to hesitate in declaring its purpose, but it is believed by some that it will eventually make use of the advantages offered by this city where there are already shops and many modero appliances for railroad work.

Hundreds of the younger generation pass from window to window gazing upon mechanical toys and knick-knacks, all realizing "thou art so near and yet so far."
